Upon reconsideration of the claims, it has become apparent that the new rejection below is necessary. The delay in identifying the issue is regretted.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 68-78 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Upon reconsideration of the claims, it was noted that claims 68 and 75 depend from a cancelled claim. However, it is also noted that each of the instant claims refers to the “nucleic acid sequence of claim 51”, but none of the pending claims are drawn to a “nucleic acid sequence”. Thus, not only are the instant claims of indeterminate metes and bounds by virtue of dependency from a cancelled claim, but also simply changing the claim dependency as currently drafted will lead to further confusion regarding the metes and bounds of the claims. Applicants should consider this upon amending the claims in response to this Office Action.
